A delegation of 12 students from the European Section (1ere & Tale) spent Wednesday 10 of December 2025 in Brest, in Océanopolis, to take part in the Simul'ONU project. Then also went to Brequigny high-school in Rennes on Wednesday, January 28, 2026

This year again over 20 delegations from 12 high-schools all over Brittany take part in the project, each representing a different country. Out students have chosen to represent China, Australia and Canada.

The topic in 2025-2026 is Sustainable Development Goal 7 "ensure sustainable, affordable and clean energy" .

First they attended lectures in Brest, on clean energy, and took part in interactive activities focusing on the same topic. Then the day in Rennes focused on what UNO is, how it works, as well as workshops on how to deliver a speech.
