MODEL UNITED NATIONS

18 March, 2025

This year's conference was held in the purpose of tackling the issue of protecting seas and oceans across the globe. It is the main purpose of ODD 14 - life below sea.

This year, our school had three delegations representing New Zealand, Portugal as well as the USA.

The day opened with a speech by every nation, representing 23 countries. Our speeches were delivered in English and presented resolutions to be adopted in order to protect our oceans.

Despite rowdy exchanges led by the USA and Russia, and adhered to by China, Great ideas came out of this meeting such as the fight against poaching in the oceans, the setting up of quotas by scientific leaders to protect species from overfishing as well as the creation of anti-pollution measures.
